

Southeast Elevation

Northwest Elevation

Southwest Elevation

Northeast Elevation

Proposed Elevations:

12.5m x 6.5m timber-framed ancillary outbuilding with vertical timber cladding (shown indicatively).

Pitched apex roof with a maximum height of 4.0m at the ridge and eaves height of 2.5m, finished with slate tiles. Rainwater will be collected in rain butts and discharge via gutters to the existing garden area (flower beds, ponds, trees) and/or a soakaway.

Door heights: 2090mm
Window heights: 1050mm

Windows to be set 1000mm above ground level.
