ENVIRONMENT

We recognise our responsibility to minimise the impact caused by our operations and supply chain, on the climate and are committed to sustainable production methods. We are leading the field when it comes to environmentally sustainable products and are continually looking at ways to further reduce our emissions.

Bekstone actively encourages the local community to be part of what we do, by communicating with our neighbours, we aim to establish a better understanding of their needs, to retain key relationships so that planning for the future of our countryside is achieved together.

“Bekstone is committed to responsible sourcing and carbon reduction. Since beginning our carbon reduction programme we have reduced our CO₂ emissions per tonne of production by over 40%.”

“We work closely with our neighbours and the local community to ensure the future of our countryside is in safe hands.”

BREEAM addresses wide-ranging environmental and sustainability issues, enabling us to prove the environmental credentials of our building products. We have BREEAM A+ 'Excellent' rating for all our walling products.

Bekstone are proud to achieve ISO 9001:2015 Quality Management Systems.

Bekstone's commitment to sustainability is reinforced by our ISO 14001:2015 Environmental Management Systems.

Proud members of the Builders Merchants Federation.

MANUFACTURING

As with all good manufacturing operations, Bekstone puts Health & Safety first amongst its priorities and through employee induction, mentoring and ongoing training, we firmly believe in continuously improving our year on year safety performance.

Capital investment in new equipment is key to the future of Bekstone. By careful examination and thorough investigation all new purchases are aligned with Industry best standards in terms of design, Increased productivity, operator effectiveness and cost control.

Factory efficiency is measured across all production lines throughout the day, with a mindset of continuous improvement to all areas of the workplace. We actively encourage team working to bring the very best results to our everyday operations.
