To whom it may concern,

Re: Application for a mobile home for Mr H J & Mrs M J Vincent, Parsloe Farm, Rodbourne

I am writing in full support of the above application. The Vincent family have been clients of Avon Farm Vets and Hale Veterinary Group for many years. I have been directly involved in the farm since 2010. During this time, the family have invested in staff, infrastructure and proactive veterinary care in order to improve the health and welfare of the cattle on the holding.

The application refers to a location away from the main farmstead where all of the youngstock from the 220 cow dairy herd are reared. Accommodation at this site would ease the daily workload for the care and management of these young animals, increasing observation and therefore ensuring the high standards of care are maintained. Breeding of the youngstock is carried out at this location – frequent observation of these animals will help to improve detection rates and efficiency. In addition, the dry cows (non-milking cows that are waiting to calve again) are also housed and managed on this site. These cows are close to calving and therefore require around the clock monitoring in order to ensure that any problems at calving are detected in a timely manner, optimising the health and welfare of both the cow and unborn calf.

If you would like further information, please feel free to contact me.

Yours sincerely,

Stephen Shiles BVSc MRCVS
