SCALE: 2cm = 1 MTR

1 2 3 4 5 = 5 MTR'S

2 CM TO 1 MTR.

A hand-drawn diagram of a wall cross-section on a blue grid background. The wall consists of several layers: a top layer of brickwork (represented by horizontal lines with diagonal hatching), a middle layer of plum slate (represented by horizontal dashed lines), a layer of edge plumb (represented by a solid horizontal line), a layer of edge of garden (represented by a solid horizontal line), a layer of curtilidge (represented by a solid horizontal line), and a bottom layer of plum slate (represented by horizontal lines with diagonal hatching). The labels are written in capital letters to the right of the corresponding layers.

PLUM SLATE

Diagram illustrating the conversion of 5 meters to centimeters:

A horizontal bar is divided into 5 equal segments, numbered 1 to 5. Segments 1, 3, and 5 are shaded with diagonal lines. Below the bar, the text "2 cm to 1 mtr" is written, indicating the scale of the segments.

= 5 mtr's
