Product Details:

The Wardale® Two Tier cycle shelter uses the best selling [Wardale](#) design while utilising the space saving [Easi-Riser Two Tier Cycle Parking System](#) (sold separately). Available with Fully Enclosed or Open Extension End frames, The Wardale Two Tier Shelter provides the most protection from the elements of all of our two tier shelters.

The Wardale Two Tier cycle shelter can also be fitted with [Swinging gates](#) with a range of [locking mechanisms](#) available to create a fully lockable and secure shelter.

High-Capacity Two Tier Bike Shelter for Busy Sites

As cycling provision increases across the UK and Ireland, specifiers are increasingly turning to two tier bike shelter solutions that maximise capacity without expanding the site footprint. The Wardale system provides access from both sides and can accommodate multiple banks to create larger cycle hubs.

Typical settings include:

- Railway stations and transport interchanges
- University and secondary school campuses
- Commercial workplaces and business parks
- Residential developments and build-to-rent schemes
- Leisure centres and civic buildings

Double Deck Cycle Shelter with Maximum Weather Protection

The Wardale is recognised as Broxap's most protective double deck cycle shelter, offering enhanced enclosure options compared to other two tier models. Its robust steel framework and extended end frames help reduce wind-driven rain exposure, improving usability throughout the year.

Open or Fully Enclosed End Frames

Shelters can be configured to suit site conditions and security requirements:

- Fully enclosed extension frames for maximum sheltering
- Open extension end frames for lighter visual impact
- Anti-crawl bars available depending on surface levels

Compatible with Two Tier Bike Rack and Cycle Racking Systems

The Wardale® two tier cycle shelter is designed to integrate seamlessly with the Easi-Riser system, creating an organised parking arrangement suitable for high turnover environments.

This makes it ideal for schemes where:

- Standard Sheffield stands do not provide enough capacity
- Secure, structured cycle storage is required
- A future-proof solution is needed for phased expansion

The shelter is often specified alongside Broxap's wider range of two tier cycle racks, lockers, and cycle compounds to support complete transport infrastructure strategies.

Secure Two Tier Cycle Shelter with Lockable Gate Options

For sites requiring controlled access, the Wardale can be fitted with swinging security gates and a choice of locking mechanisms, creating a fully enclosed and lockable facility.

Security options include:

- Digital mechanical locks
- Keyed access systems
- Swinging gated entrances for compound-style control

This makes the shelter suitable for commuter parking, high-value cycle storage, and managed residential access.

Materials, Finish, and Installation Flexibility

The Wardale structure is manufactured from heavy duty steel with trapezoidal roof cladding as standard. A wide range of finishes and optional upgrades allow integration into both contemporary and heritage environments.

Available options include:

- Polyester powder coating in standard RAL colours
- LED or solar lighting for improved visibility
- Extended adjustable baseplates for submerged fixing
- Modular extensions to increase cycle capacity over time

Broxap also provides a full installation service across the UK and Ireland, ensuring correct placement, anchoring, and long-term performance.

Key Features at a Glance

- Wardale® design paired with Easi-Riser two tier system (sold separately)
- High-capacity two tier cycle shelter for space-efficient parking
- Open or enclosed end frames for enhanced weather protection
- Optional secure gates and locking mechanisms
- Modular design allows future extension and multiple banks
- Durable steel construction with roof cladding and powder coat finish
- Lighting and anti-climb enhancements available

Complementary Cycle Parking Infrastructure

The Wardale Two Tier Shelter is often specified as part of a wider cycle parking strategy, alongside Broxap's cycle stands, lockers, street furniture, and secure compounds to support modern active travel requirements.

Options:

- Steel Profile, Trapezoidal Roof Cladding
- Open or Enclosed Extension End Frames
- Extended Adjustable Baseplates for Submerged Fixing
- Swinging Security Gates
- Digital Mechanical or Keyed Locks

- Further Anti Crawl Bars can be fitted Dependant on Surface Level
- Powder Coating to a wide range of colours
- LED or solar lighting
- Multiple Banks to Increase Cycle Capacity
- Full Installation Service
