Dear Sir, **Planning Application: PL/2026/04987 11 High Street, Ramsbury**

The above planning application does not directly abut my property. However I am aware that this area including the property seeking planning permission is in a Conservation Area. This conservation area requires that buildings should reflect the ambience and character of the local area and not detract from the surroundings and architecture of this historic village.

From the localised traffic and delivery vehicles, it appears that building work has already commenced on the site although my neighbours and I have had no advance opportunity to comment prior to your letter dated 27 August which arrived on Tuesday 1 September.

From the sketchy proposal it appears that the development at No.11 High Street will have no visual impact on our quality of life but I must advise that when the detailed plans are published we will want to ensure that the planned building additions will not go against the strictures of the Conservation Area code, which is designed to protect the local environment from unrestricted and clumsy buildings and the removal of trees that might restrict such a development..

We look forward to having an opportunity to view and comment on the building plans when they are available for review by interested parties in the village.
